Languages: Arabic (Native), English (Fluent)

PROFESSIONAL SUMMARY

Front-End Developer with 2+ years of hands-on experience building responsive, production-quality web applications with React, Next.js, and TypeScript. Delivered 6+ end-to-end projects spanning SaaS admin dashboards, e-commerce platforms, and business websites, with a focus on component-driven architecture, REST API integration, and clean UI implementation. Currently completing a Bachelor's degree in Management Information Systems (MIS) with a Business Analytics focus, bringing a data-informed, problem-solving approach to front-end engineering. Experienced collaborating in team settings using Git/GitHub workflows, pull requests, and code review.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React, Next.js 15, Redux Toolkit, Zustand, React Router, Recharts, Express.js, Node.js

Styling: Tailwind CSS, Shadcn UI, Bootstrap 5, Responsive / Mobile-First Design

APIs & Tools: REST API Integration, Axios, Git, GitHub, Agile Workflow, Code Review, Pull Requests, Figma, Vercel, GitHub Pages

Other: Cyber Security Fundamentals, Cross-Browser Compatibility

PROJECTS

DevSync Agency (Team Project) | Next.js, React, TypeScript, REST API

Live Demo: devsync-agency.vercel.app

- Collaborated with a cross-functional development team to build a software agency platform consisting of a public website and a content-managed admin dashboard, using a Git/GitHub workflow with pull requests and code reviews.
- Built responsive UI components and integrated REST APIs to enable dynamic management of projects, services, clients, and testimonials without code changes.

Enterprise Admin Dashboard | React 19, TypeScript, Recharts

Live Demo: enterprise-admin-dashboard-phi.vercel.app

- Built a production-ready SaaS admin dashboard inspired by Stripe, Linear, and Vercel design patterns, featuring authentication, analytics, and full CRUD modules for users, products, and orders.
- Designed a reusable component library of 30+ UI components in TypeScript, enabling consistent dark/light theming and reducing duplicate code across the application.
- Implemented interactive data visualizations with Recharts alongside search, filtering, pagination, modals, drawers, and notification systems to support complex admin workflows.

Abyssal Elegance — Fine Dining Platform | React, TypeScript, Node.js, Gemini AI API

Live Demo: ingenious-exploration-production-8628.up.railway.app/

- Architected and deployed a full-stack luxury dining web application featuring an AI Sommelier Engine powered by the Google Gemini API to generate personalized multi-course wine and dining pairing recommendations.
- Built an interactive menu with real-time multi-criteria filtering (dietary tags, price, chef signatures) and a custom REST API backend for table reservations with booking validation and persistent state management.

- Designed a dark glassmorphism UI with full bilingual (Arabic/English) support, fluid responsive layouts, and WCAG accessibility compliance.

ShopCo — E-Commerce Platform | React, Vite, Context API

Live Demo: shop-co-one-mu.vercel.app

- Built a modern e-commerce storefront with product browsing, wishlist, shopping cart, secure checkout, and user authentication, using Context API for global cart/wishlist state and Vite for optimized builds.

Bright Smile — Business Website | Next.js, TypeScript, Framer Motion

Live Demo: bright-smil.vercel.app

- Designed and developed a responsive business website with service listings, team profiles, pricing plans, an FAQ system, and an appointment booking flow, using Framer Motion for smooth micro-interactions and page transitions.

EDUCATION

Bachelor's Degree in Management Information Systems (MIS)

Higher Institute of Management & Information Technology, Kafr El-Sheikh | 2024 – Present (Expected Graduation: 2028)
